FEDERAL COMMUNICATIONS COMMISSION OFFICE OF THE SECRETARY

Re: CS Docket #97-55, FCC 9万34

Dear Chairman Hundt and Commission:

I am writing on behalf of the National PTA, the New Jersey PTA and as a member of the Washington School PTA to voice my opposition to the v-chip rating system as presented by Mr. Jack Valenti, Chairperson of the TV Rating Implementation Group, on January 17th, 1997

The rating symbol on the TV screen does not provide sufficient content information so that a parent can make decisions about what is appropriate TV programming for their children. Major surveys released this past fall which demonstrate overwhelming parent preference for a rating system that gives parents information about the content of programs were conducted by the National PTA, U.S. NEWS & WORLD REPORT and the Media Studies Center/Roper.

Parents do not want the TV Industry to interpret what is best for their children. Parents want to make those choices themselves based on content information about the program. Any rating system without content descriptions on the screen and publicized in periodicals that carry TV scheduling is useless.

The FCC, by law, is required to determine whether the industry's rating system has met statutory requirements of the Telecommunications Act of 1996. I do not believe this system does so and ask that the FCC not approve the industry rating system. Instead, I request the following::

That under no circumstances should the FCC approve the industry's rating system. Further, the FCC should accept no rating system that does not include content information about programs such as V for Violence, S for Sexual depiction and nudity and L for Language:

That the FCC require a v-chip band broad enough that would allow parents to receive more than one rating system. Further, that the rating icon on the TV screen be made larger. more prominently placed on the screen and appear more frequently during the course of a program;

That the rating board be independent of the industry and the ECC and that it include parents. Further, that any rating system approved by the FCC be elevated by independent research to determine if it meets the needs of parents.

Thank you for this opportunity to comment on an issue so important to children and to their families.

Sincerely, Hudy M. Hyda Mullisa 450 Lewardowski St., Lyndhurst, NJ 07071

EX PARTE OR LATE FILED

FEDERAL COMMUNICATIONS COMMISSION Re: CS Docket #97-55, FCC 97-34 Dear Chairman Hundt and Commission FFICE OF THE SECRETARY

I am writing on behalf of the National PTA, the New Jersey PTA and as a member of the *Washington School PTA* to voice my opposition to the v-chip rating system as presented by Mr. Jack Valenti, Chairperson of the TV Rating Implementation Group, on January 17th, 1997.

The rating symbol on the TV screen does not provide sufficient **content** information so that a parent can make decisions about what is appropriate TV programming for their children. Major surveys released this past fall which demonstrate overwhelming parent preference for a rating system that gives parents information about the **content** of programs were conducted by the National PTA, U.S. NEWS & WORLD REPORT and the Media Studies Center/Roper.

Parents do not want the TV Industry to interpret what is best for their children. Parents want to make those choices themselves based on content information about the program. Any rating system without content descriptions on the screen and publicized in periodicals that carry TV scheduling is useless.

The FCC, by law, is required to determine whether the industry's rating system has met statutory requirements of the Telecommunications Act of 1996. I do not believe this system does so and ask that the FCC not approve the industry rating system. Instead, I request the following::

That under no circumstances should the FCC approve the industry's rating system. Eurther, the FCC should accept no rating system that does not include content information about programs such as V for Violence, S for Sexual depiction and nudity and L for Language;

That the FCC require a v-chip band broad enough that would allow parents to receive more than one rating system. Further, that the rating icon on the TV screen be made larger, more prominently placed on the screen and appear more frequently during the course of a program:

That the rating board be independent of the industry and the FCC and that it include parents. Further, that any rating system approved by the FCC be elevated by independent research to determine if it meets the needs of parents.

Thank you for this opportunity to comment on an issue so important to children and to their families.

Sincerely,

, Lyndhurst, NJ 07071
